

## DRMA Extreme Bots Competition

Three Four County Career Center programs collaborated their career and technical skills in preparation for the state DRMA Extreme Bots Competition to be held at Miami Valley Career Center in Dayton. Students from the Pre-Engineering program, Computer Design/3D Modeling program, and Software Design and Web Development program designed, wired and built the “Battle Bot” robot which runs off a remote control for this competition. Shown putting the finishing touches on their project before the competition are (LEFT TO RIGHT) Grant Krauss (Edgerton) Pre-Engineering; Matt Smith (Bryan) Computer Design/3D Modeling; and Tony Hug (Fairview) Software Design and Web Development. Tim Armitage, Pre-Engineering instructor, will assist them to the competition.
