

FFA Team Places 9th at State

Four County Career Center FFA students Nathan Seiler (Fayette) and Quinten Keefer (Fayette) recently took 9th in the State FFA Agricultural and Industrial Diagnostics Contest held at the University of Northwestern in Lima. Over 700 students from all of Ohio competed in the local written examination and practical skills event to determine their expertise of tractors. At the state level a panel of judges graded each school in the areas of workmanship as a team, safety practices, problem-solving techniques and identification, and repair of malfunctions to determine the state champions.
