

# Pre-Engineering Open House

Four County Career Center's Pre-Engineering program recently hosted an information night for any current 10th grade students in the four county area interested in applying for the 2012-2013 school year. This tech prep program is housed at Northwest State Community College to be able to take advantage of state-of-the-art labs. Students take their academic courses at the Career Center or a post secondary institution for one-half day and the other half day is spent in lab experiencing advanced robotics, electronics, computer aided design, and computer aided machining technologies. Students have a potential of earning college credits at Northwest State Community College for all courses.

Registrations for the Pre-Engineering program will be accepted through March 15. Questions can be addressed by contacting Tim Armitage at Four County Career Center at 1-800-589-3334, Ext. 3528.
