

# Senior Citizens Day

Senior citizens from the four county area recently spent half of a day at Four County Career Center learning how to plant a plant, make a bow, etch a glass, get their nails done or hair cut or just watch the welders make shephards hooks, at the first annual Senior Citizens Day. The Career Center hosted about 70 seniors and gave them the opportunity to find out what skills the students are learning and to learn a few skills of their own. Student ambassadors assisted them throughout the day escorting them to the labs and enjoying a soup and salad luncheon with them prepared by the Chef Training students in the Four Star Cafe. This event allowed the senior citizens the opportunity to learn about the school and understand the value it has to the community and for the students to learn the importance of good customer service. Plans are underway for next year's event.
