

Welding Projects

As part of their lab skills training, students from Four County Career Center's Welding Fabrication program are currently taking requests for small welding fabrication projects. Projects are made to the specifications of the person requesting the item. There is a nominal service fee for the construction as well as the cost of the materials used. For more information or to place an order this fall, contact instructor Jim Fox at 1-800-589-3334, Ext. 2391.
