

Construction Trades Open House

The public is invited to attend the 45th annual Four County Career Center's Building Trades Open House on May 17 from 1:30 - 4:00 p.m. During this past year, 76 high school students at the Career Center have been constructing the 75th new home as part of their career training.

Curtis Miller, Carpentry instructor, and the senior Carpentry classes did the general construction of the home including exterior finish, interior and drywall finish, for Scott and Jodi Bernath. It is located at 1107 Main Street in Evansport.

The Bernath home is a single story ranch with two bedrooms, two full bathrooms, an open eating living area, kitchen, office and a partial basement with a crawl space.

The kitchen cabinets, vanities, and laundry room cabinets were constructed by the junior Carpentry class under the direction of instructor Ed Springer. Scott Williams, senior Electrical instructor, and his class did the low voltage, data communications, service and finish electrical wiring. Installation of the entire water supply, drainage and ventilation system was the junior and senior HVAC and Plumbing class with instructor Steve Steingass. And, assisting with the interior painting was the Interior Design class with instructor Lisa Hall.

Students at the Career Center build one house each school year. The home building project is part of the high school curriculum in the Construction Trades programs.
