

# Summer Camp

Four County Career Center recently sponsored a week long “Summer Camp” for 7th, 8th and 9th graders in the four county area. Students had the opportunity to explore the vast areas of science, math, animation and game programming, and promotion and distribution from experienced instructors. Students worked on projects throughout the week. Shown is hands-on learning in the Math: Easy as Pi, Game On!, Science of Sports and Recreation, and Make Me Famous! classes.
