

Students Take Part in Mfg. Day

Four County Career Center's Pre-Engineering class joined presenters on Manufacturing Day, a part of the Ohio Manufacturing Extension Partnership, held at Northwest State Community College. Area high school students attended the day and learned not only what opportunities are available through the Career Center and college, but had the opportunity to meet with over thirty employers from the four county area and hear about jobs available. Shown in the Machining lab are (LEFT TO RIGHT) Jewels Fowler; and Cole Stuckey (both from Fayette); with current Pre-Engineering student, Aaron Conrad (Delta); past Career Center graduate and current NW State student in Mechanical Engineering, Brock Hoops; and Pre-Engineering instructor Tim Armitage. The Henry County Community Improvement coordinated the event.
